SUMMARY

AI/ML developer proficient in Python, full-stack development, and LLMs, building intelligent applications that automate processes and deliver measurable impact.

WORK EXPERIENCE

Coding Jr

Feb 2025 – Apr 2025

- Developed an **AI Copilot** using **LLMs** and **RAG** to automate common e-commerce workflows, reducing manual effort by **30%** and improving operational efficiency.
- Conducted a detailed analysis of **e-Commerce processes**, identifying **10+ workflow inefficiencies** and designing **AI-driven solutions** to improve business workflows.
- Built a **search pipeline** delivering faster, context-aware results, significantly reducing query resolution time and improving user experience.

PROJECTS

AI-Powered Health & Fitness Tracking Platform

[GitHub](#)

- Developed a full-stack **health monitoring application** using **Python, FastAPI, SQLAlchemy**, tracking **workouts, dietary intake**, and providing **90% accurate nutritional data** via a **nutrition tracking API**, reducing manual planning time by **80%**.
- Optimized **database schema** and implemented **asynchronous processing** with **Pydantic**, reducing API latency by **40%** and ensuring reliable, continuous health monitoring.

SmartSlide – Automated Presentation Insights & Quiz Generator

[GitHub](#)

- Built a **streamlit**-based PPT analyzer in **Python**, supporting multi-PPT uploads, semantic search & summarization using **LangChain, ChromaDB, HuggingFace embeddings, Groq LLaMA**, achieving **90%+ extraction accuracy**.
- Implemented context-aware **MCQ quiz generation**, optimized token-aware chunking (8,000 tokens/batch), reducing **API calls** & memory usage by **40%**, enhancing engagement & learning outcomes.

EDUCATION

2022 – 2026 **Bachelor of Technology in Computer Science**, SRM AP University (GPA: 8.0/10)

CERTIFICATIONS & ACHIEVEMENTS

- **FastAPI (Udemy)** – Completed a comprehensive course on REST APIs, SQLAlchemy, OAuth & JWT
- **BITS Hackathon – Generative AI Track**: Advanced to the final round as part of a team, developing AdVerve, an AI-powered ad copy generator.
- **Photography Club Member** – Fostered teamwork while pursuing creative passion

SKILLS

Languages

Python, Java, C++

Web Technologies

HTML, CSS, React.js, Streamlit, FastAPI

Libraries/Frameworks

TensorFlow, scikit-learn, OpenCV, pandas, NumPy, Matplotlib

Core Skills

Data Structures & Algorithms, Object-Oriented Programming, Software Development, Machine Learning, AI Model Deployment

Tools/Platforms

Jupyter Notebook, VS Code, MySQL
